## **Chapter 05: Variables - Exercises**

## Exercise 05 - 01: Computing the volume of a cylinder

Write a program that reads in the radius and length of a cylinder and computes its volume using the following formulas:

```
Area = radius * radius * p

Volume = area * length
```

## **Exercise 05 - 02: Converting pounds into kilograms**

Write a program that converts pounds into kilograms. The program reads a number in pounds, converts it to kilograms, and displays the result. One pound is 0.454 kilograms.
