

## Chapter 19: GUI Basics - Exercises

### Exercise 19 - 01: Payroll

Write a program that reads the following information and prints a payroll statement:

- Employee's name (e.g., Smith)
- Number of hours worked in a week (e.g., 10)
- Hourly pay rate (e.g., 6.75)
- Tax rate (e.g., 0.20 for 20%)

Use dialog boxes to obtain input and display output.
