Network Flows

2. Search Algorithms

2.2 Breadth-First Search – An Example

Fall 2010

Instructor: Dr. Masoud Yaghini

Initialize

pred(1) = 0
next := 1
order(next) = 1
LIST := {1}

LIST

next

Breadth first search animation

Select a node i in LIST

In breadth first search, i is the first node in LIST

LIST

next

Breadth first search animation

If node i is incident to an admissible arc...

Next :=
Next + 1
order(j) := next
add j to LIST

Breadth first search animation

If node i is incident to an admissible arc...

```
Next :=  
Next + 1  
order(j) := next  
add j to LIST
```

LIST

1	2	5						
---	---	---	--	--	--	--	--	--

next

3

Breadth first search animation

If node i is incident to an admissible arc...

Next :=
Next + 1
order(j) := next
add j to LIST

next

Breadth first search animation

If node i is not incident to an admissible arc...

LIST

next

Breadth first search animation

Select Node i

The first node on LIST becomes node i

LIST

next

Breadth first search animation

If node i is incident to an admissible arc...

Next :=
Next + 1
order(j) := next
add j to LIST

LIST

next

5

Breadth first search animation

If node i is not incident to an admissible arc...

LIST

next

Breadth first search animation

Select a node

LIST

next

Breadth first search animation

If node i is incident to an admissible arc...

Next :=
Next + 1
order(j) := next
add j to LIST

LIST

next

Breadth first search animation

If node i is not incident to an admissible arc...

Delete node i from LIST

LIST

next

Breadth first search animation

Select node 3

delete node 3 from LIST

LIST

next

Breadth first search animation

Select a node

$i := 4$

LIST

next

Breadth first search animation

If node i is incident to an admissible arc...

Next :=
Next + 1
order(j) := next
add j to LIST

LIST

next

Breadth first search animation

If node i is not incident to an admissible arc...

Delete node i from LIST

LIST

next

Breadth first search animation

Select node i

LIST

next

Breadth first search animation

If node i is incident to an admissible arc...

Next :=
Next + 1
order(j) := next
add j to LIST

LIST

next

Breadth first search animation

If node i is incident to an admissible arc...

Next :=
Next + 1
order(j) := next
add j to LIST

LIST

next

Breadth first search animation

If node i is not incident to an admissible arc...

Delete node i from LIST

LIST

next

Breadth first search animation

Select node 8

LIST

next

Breadth first search animation

Select node 7

node 7 is not incident to an admissible arc; delete it from LIST

LIST

next

Breadth first search animation

Select node 9

node 9 is not incident to an admissible arc; delete it from LIST

LIST

next

9

Breadth first search animation

The End
